

QUICK START GUIDE

FILTERS – ADVANCED

Learn How To:

1. Use Filters & Their Functionality
2. How to Create a Filter in the Samples, Equipment & Labels Tabs
3. Delete Filters

FILTER EXPLANATION

Filters are a set of specific saved search criteria called “properties” that allow users to narrow down what information displays throughout the different tabs of the Labcheck portal. Based on the filter conditions that are applied, data will be displayed accordingly.

Filters are designed to save time when searching for Sample Reports and Equipment or when creating Labels or Management Reports.

Filters are applicable to the SAMPLES, EQUIPMENT, LABELS, REPORTS and DISTRIBUTION tabs.

FILTER PROPERTIES

Filter Properties are the data fields in which you choose to apply your filter. Depending on which tab you are in, the applicable filter properties are applied.

The table below explains which properties are applicable on each tab.

SAMPLES	EQUIPMENT	LABELS	REPORTS
Customer Name Customer Worksite City / State / Zip Unit ID Unit Worksite Unit Make Unit Model Component Type Component Make Component Model Component Reference Number Sample Condition Oil Manufacturer Oil Brand Oil Grade	Customer Worksite Unit ID Unit Manufacturer Unit Model Component	Component Unit ID Customer Worksite Tracking Number Status	Customer Worksite Date Range

FILTER OPERATORS

Equals

Will only display results that match the exact value input for the given property

Not equals

Will only display results that do not match the exact value input for the given property

Starts with

Will only display results that begin with the value input for the given property

Contains

Will only display results that contain the value input for the given property

FILTER VALUES

The Value field should be filled out based on what Property and Operator are selected. For example, if you are searching reports, but only want to view reports for engines, you would select 'Component' as the property. In the Operator field, you would choose 'Equals' because you know the exact component you are looking for. Last, in the value field, you would enter 'Engine.' So for this example, it would pull up all engines.

FILTERS ON THE SAMPLES TAB

The screenshot shows the Castrol Labcheck interface. At the top, there is a navigation bar with tabs for HOME, ACTIONS, SAMPLES, LABELS, EQUIPMENT, ANALYTICS, REPORTS, DISTRIBUTION, ADMIN, and PREFERENCES. Below the navigation bar, there are filter buttons: "Component equals Cooling System" (with an 'x' icon), "Severity in C,D" (with an 'x' icon), and "+ Add Filter". A "DATE RANGE" dropdown is set to "All Data", and a "SHOW" dropdown is set to "All". A "MARK SAMPLES" button is also visible. A table of sample data is displayed with columns: SEVERITY, LAB NUMBER, SAMPLED DATE, RECEIVED DATE, UNIT ID, COMPONENT, and COMPONENT MAN. The table contains 10 rows of data. A dropdown menu is open over the table, with a red arrow pointing to the "Clear All" option. The menu options are: Clear All, Save Filter, Combine Conditions, Select Existing Filter, and Delete Filter. At the bottom left, it says "Showing 10 rows".
